Safety Spotlight

Lockout For Your Safety!

Before servicing, cleaning, or otherwise entering a machine or a piece of equipment, you must follow appropriate **LOCKOUT-BLOCKOUT-TAGOUT-TRYOUT** procedures.

LOCKOUT BLOCKOUT - Disengage, block, lock and totally de-energize a piece of equipment or machinery prior to cleaning or performing any maintenance.

TAGOUT - Place warning tags on the equipment energy source to warn others to not start the equipment.

TRYOUT - Test the equipment for possible stored energy.
